RE: Home Renovation Rebate Program Limited Time Special Offer

Dear Assured Insulation Services A Div. Of Assured Pest Solutions Inc.,

As a contractor who has helped many customers install home energy upgrades that qualify for rebates, we thought you'd be interested to know about this limited time special offer.

Customers living in electrically heated homes may be eligible for up to **an additional \$250** if they complete qualifying upgrades by March 31, 2017.

Participants can get an additional \$250 rebate when they complete two qualifying home energy upgrades or an additional \$100 if they are only installing one home energy upgrade. That's in addition to the rebate that's already standard for that specific improvement.

Qualifying upgrades* for the special offer include:

- Insulation: up to \$1,200 rebate
- Ductless heat pump: \$800 rebate
- Draft proofing: up to \$500 rebate

*Qualifying upgrades must be of two different types (ie. Attic insulation and wall insulation) and must be installed in the same dwelling. A previous upgrade that received a rebate can count as one of the two qualifying upgrades. Additional conditions apply.

How to participate:

- Complete at least one qualifying upgrade between October 1, 2016 and March 31, 2017
- Complete the rebate application form available online, using the promo code: WARM2017
- Submit the application with all supporting documents postmarked between Feb 1 and March 31, 2017.

For more information on how to qualify for the special offer, visit bchydro.com/homerebates or call **Tony Ceh at 604.623.3629**.

Thanks,

Margo Longland
